

Regulatory Board Communiqué No. 2/2026
dated 1 October 2026

Amendments to Directive Ad hoc Publicity and Issuers Committee Circular No. 1 following the introduction of the AHPdigital reporting platform

I Background

As part of the technological modernisation in the area of ad hoc publicity, SIX Swiss Exchange is replacing the Connexor Reporting platform with AHPdigital.

AHPdigital offers the same functionalities as the previous platform; no new obligations are being introduced. However, a new technical connectivity option ("machine-to-machine") will be available. As of 15 November 2026, all issuers of primary-listed equity securities will be required to transmit their ad hoc announcements to SIX Exchange Regulation AG via the platform AHPdigital.

II Amendments

In line with the introduction of the AHPdigital reporting platform, Art. 12a para. 1 Directive Ad hoc Publicity (DAH) and margin number 16 Issuers Committee Circular No. 1 (IC-CIR1) are amended. The references to Connexor Reporting are removed.

Furthermore, Art. 12a para. 1 DAH stipulates that any ad hoc announcements which could not be transmitted due to a technical issue with the new reporting platform must be submitted retrospectively to SIX Exchange Regulation AG via the platform once the issue has been resolved.

III Entry into force

The revised provisions will enter into force on 15 November 2026 and are published at the following [link](#).

Regulatory Board Communiqués are published in German, French and English on the Internet.
