

**Communiqué No. 1/2024**  
of 7 February 2024

## Simplification of Disclosure Notifications

SIX Exchange Regulation AG (SER) is digitising and simplifying the submission of disclosure notifications and their publication in accordance with the Financial Market Infrastructure Act (FinMIA) for all investors and issuers involved.

With the introduction of the new platform «OLSdigital», SER will offer a fully digitalised way of fulfilling investors' and issuers' reporting obligations from 4 March 2024 onwards.

With the new publication platform «OLSdigital», each investor subject to the reporting obligation can complete the disclosure notification directly online. This procedure combines various advantages: the completed disclosure notifications are submitted directly to the Disclosure Office of SER as well as to the issuer. Each issuer, respectively the Disclosure Office of SER can track the disclosure notifications of the investors more easily and check them for completeness and correctness. At the same time the error rate of the notifications is reduced by this procedure, since they no longer need to be transferred from physical disclosure forms.

To enable and ease the transition to the digital reporting channel for all relevant stakeholders, SER will provide a corresponding manual on «OLS digital».
